

# Low Profile (LP) Tank

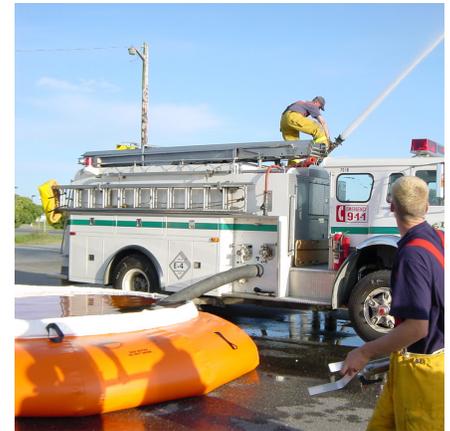

The Fireflex Low Profile (LP) Tank is a perfect water relay tank in rural areas or in any situation where water access is an issue. It is fully self-supporting, has an open-top design and has a wide collar for easy filling. Fireflex LP Tanks enable fire departments still obtain enough water for effective firefighting to use in isolated areas.

It is lighter and safer than traditional framed tanks and is easy to deploy by only one person. It is quickly filled from a water tender in mere minutes. With its versatility, the LP Tank can be used in remote site locations or can act as a water reservoir placed close to the fireline.

## Design Features

- No parts to assemble;
- Easily and quickly deployed by just one person;
- Frameless tank constructed of durable, lightweight yet high-strength fabric, which is mold- and mildew-resistant;
- The foam-filled collar eliminates the need for inflation and will rise automatically when filling;
- Multi-point tie down system for secure grounding;
- Fast, easy filling from water tenders;
- Lifting strap inside the center of the tank allows for easy cleaning and drying;
- Fast discharge through a standard 3" NPT outlet;
- Low maintenance, easy to clean and repair; and
- Compact for easy storage, fits inside a standard vehicle for transport, provides long-term water storage.

## Add-Ons and Accessories

- Ball valves / fittings;
- Ground pads;
- Transport bags;
- Repair kits;
- Drainage outlets: 1" to 6" NPT; and
- Secondary internal impact pads available for large size tanks.

## Applications

- Water relay tank;
- Long- or short-term water storage; or
- Protection of urban interface exposures.

**Please note:** If using your tank exclusively for mixing foam and/or retardants, please use the Fireflex Hazmat tank.

# Low Profile (LP) Tank

## LP Tank

Multi-point tie down system for secure grounding during operations.

The tank can be easily folded by just one person.

The LP Tank is perfect for structural firefighting.
